$$\frac{AC}{CD} = \frac{\sin \angle ADC}{\sin \angle CAD} = \frac{\sin \angle APE}{\sin \angle EPF},$$

$$\frac{BD}{EF} = \frac{BD}{BF} = \frac{\sin \angle BFD}{\sin \angle BDF} = \frac{AP}{PF},$$

$$1 = \frac{S_{\triangle APE}}{S_{\triangle EPF}} = \frac{AP \cdot PE \sin \angle APE}{PF \cdot PE \sin \angle EPF} = \frac{BD}{EF} \cdot \frac{AC}{CD}$$

$$\therefore EF \cdot CD = AC \cdot BD$$
